FATRET DEGISIONS.

Commissioner Fisher made to-day the following important patent decisions: "Applications for the extension of leiters patent previously granted for an improvement in power looms, and for an improvement in spading machines. I hold that the grant of a foreign patent before the issue of an Americas patent in fatal to the application for the extension of the American patent, if the foreign patent expired before the extension of the American patent, if the foreign patent expired before the original term of the patent sought to be extended. It is immaterial whether the American patent was applied for before the foreign patent or not; that was important under the prior laws, but no such distinction exists under the set of 1870. The typner of the above patents was taken out in England, France, and Belgium prior to the grant of the American patent and the English patent has already expired. This point is fatal to the application. Another fatal objection is the omission to set forth in the statement of the Typichice the ascertained where of the invention, as required by lew. I turnber am of the opinion that the policy which Congress declares in the act of July 8th, 1870, is, that if a foreigner obtains a patent in his own country and permits it to expire there, it shall sho expire in this country, so that the right to the invention without liability to the inventor shall be simultan count in this and the most favored foreign pation. A slip of memory made us say nour article of vesterday that the Pensacola and Louisville reliroad from Montgomery, Alabama, to Pensacola will be finished this winter, when, as a matter of idea, that section of the road is already completed, equipped and running. The only section of the road unfinished is that between Decistur and Montgomery, which will be completed by the first of December of next year. Then we shall have an alr ling from Louisville to the Gult—a lies which brings Chicago closer to Pensacola than to New York, and one which makes Louisville the distributing point of the highway. North and Bouth.

A "great tempest in a teapot" has been excited by the simple fact that the U. S. flag was lowered at the recent State flar in Atlants, Gs. The flag, it appears, was raised without authority; it being the custom always to raise no flag but that of the society itself—even the State flag was never permitted to fly. The diargard of this rule caused the flag to be lewered. When it became a voluntary and not a coarcive proceeding, the President of the Society, Mr. Yancey, elevated the flag to the color head. The name of "Yancey" the President of the Agricultural Society, was the brother of the great orator Was. L. Yancey, and himself a man of conspicuous salent, he was amonget the first to the President of the Agricultural Society, was the brother of the great orator Wm. L. It is signed by hall soo public as Count General. It is not marked upon the one who desires to see it. It is signed by him as Consul General. It is not marked private, nor is there any indication about it that its author-an experienced writer for the press—did not intend it for publication. We published it just as it was writtes, except that for the name of the individual editor of the Sun, to whom it was sent by BUTLES, we substituted the
